

**AINotify** is a powerful SMS, email, voice and pager secure messaging service. It is available as part of the leading incident management system **AiControlPoint** or as a standalone system.

The service is hosted in the cloud and is accessible through a dedicated web address.

All your contact details can be stored online in the encrypted vault and all messages are visible through the same secure portal.

There is no minimum or maximum volume of texts and they are all at a fixed cost.

### **AINotify is for:**
